Fluorine in Life Sciences: Pharmaceuticals, Medicinal Diagnostics, and Agrochemicals: Progress in Fluorine Science Series

Fluorine in Life Sciences: Pharmaceuticals, Medicinal Diagnostics and Agrochemicals, volume four in Alain Tressaud's Progress in Fluorine Science series, presents a critical, multidisciplinary overview of the contributions of fluorinated products to solve important global issues in various life science fields, particularly in medicinal chemistry, molecular imaging techniques and agriculture. Edited by recognized experts, this book provides unique coverage of the wide-ranging uses and implications of fluorine and fluorinated compounds. Topics include medicinal monitoring and diagnosis, ¹⁹F MRI in medicine and in vivo cell tracking, ¹⁸F-labeled radiopharmaceuticals, brain imaging and neurology, risk assessment of reactive metabolites in drug discovery, and more. Edited by Alain Tressaud, past Chair and founder of the CNRS French Fluorine Network, each book in the collection also includes the work of highly-respected volume editors and contributors from both academia and industry who bring valuable and varied content to this active field.
