

GERMANY & THE 2ND WW

This is the third in the comprehensive ten-volume Germany and the Second World War. The five volumes so far published in German take the story to the end of 1941, and have achieved international acclaim as a major contribution to historical study. Under the auspices of the Militargeschichtliches Forschungsamt (Research Institute for Military History), a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War. Volume 3 explores the conduct of the war in the Mediterranean region and examines the dramatic military events of this period. It shows how German policy in this area was largely determined by the attitude of the German leadership, especially Hitler, towards Mussolini's Italy, and the volume thus sheds important new light on the alliance policy of the Third Reich. The comprehensive analysis, based on detailed scholarly research, is underpinned by a full apparatus of maps, diagrams, and tables. Intensively researched and documented, Germany and the Second World War is an undertaking of unparalleled scope and authority. It will prove indispensable to all historians of the twentieth century.
