## Normativity, Rationality and Reasoning

Selected Essays

---

This volume is a selection of Broome's recent papers on normativity, rationality, and reasoning. It covers a variety of topics such as the meanings of 'ought', 'reason', and 'reasons'; the fundamental structure of normativity and the metaphysical priority of ought over reasons; the ownership - or agent-relativity - of oughts and reasons; the distinction between rationality and normativity; the notion of rational motivation; what characterizes the human activity of reasoning, and what is the role of normativity within it; the nature of preferences and of reasoning with preferences; and others. These papers extend the work presented in his book *Rationality Through Reasoning* but there is little overlap between their content and the book's. They develop further some themes and arguments from the book, and answer some questions that the book left unanswered.
