

Governing through Goals - Sustainable Development Goals as Governance Innovation

A detailed examination of the UN's Sustainable Development Goals and the shift in governance strategy they represent. In September 2015, the United Nations General Assembly adopted the Sustainable Development Goals as part of the 2030 Agenda for Sustainable Development. The Sustainable Development Goals built on and broadened the earlier Millennium Development Goals, but they also signaled a larger shift in governance strategies. The seventeen goals add detailed content to the concept of sustainable development, identify specific targets for each goal, and help frame a broader, more coherent, and transformative 2030 agenda. The Sustainable Development Goals aim to build a universal, integrated framework for action that reflects the economic, social, and planetary complexities of the twenty-first century. This book examines in detail the core characteristics of goal setting, asking when it is an appropriate governance strategy and how it differs from other approaches; analyzes the conditions under which a goal-oriented agenda can enable progress toward desired ends; and considers the practical challenges in implementation. Contributors Dora Almassy, Steinar Andresen, Noura Bakkour, Steven Bernstein, Frank Biermann, Thierry Giordano, Aarti Gupta, Joyeeta Gupta, Peter M. Haas, Masahiko Iguchi, Norichika Kanie, Rakhyun E. Kim, Marcel Kok, Kanako Morita, Måns Nilsson, László Pintér, Michelle Scobie, Noriko Shimizu, Casey Stevens, Arild Underdal, Tancrede Voituriez, Takahiro Yamada, Oran R. Young
