An Introduction to Classical Hebrew

This grammar introduces undergraduate and graduate students to the essentials of classical Hebrew. It begins with the simple and regular elements of the language and proceeds to the complex and irregular, frequently referencing the historical development of Hebrew. Extensive explanations of elements in English prepare students for the discussion of the corresponding Hebrew element. Through the course of the text, the reader will translate the book of Ruth as well as other biblical and nonbiblical texts, learning particular skills in reading both the entire Hebrew Bible and the later sixth-century Hebrew material, such as the Lachish Letter. Accomplished students of this text will be prepared to progress to advanced study of Hebrew grammar and exegesis of the Hebrew Bible.
