Asia.com

The internet is developing quicker in Asia than in any other region of the world. This book is the first comprehensive analysis of the information society in an Asian context, and the impact of these technologies in Asia. These impacts are inevitably uneven and conditioned by issues of telecommunications infrastructure, government policies, cultural and social values, and economic realities. The combination of original research, theoretical innovation and detailed case studies make this an important book for scholars and students in Asian studies, media studies, communication studies and sociology.
