International Trade Law

International Trade Law offers a comprehensive and informed analysis of the complexities of an international sale transaction through case law, policy documents, legislation, international conventions and rules adopted by international organisations such as the ICC. Focusing on international sales of goods and the various relations that arise as a result of sale contract, this book considers and discusses: · standard trade terms, major conventions and principles · issues relating to E-Commerce · international transportation of cargo · insurance and payment mechanisms · dispute resolution

Accessible to students encountering this often challenging area of the law for the first time, International Trade Law clarifies a range of topics through tables and diagrams, and directs the reader to relevant further reading, online resources, and journal articles throughout.
