

Green

Venture Capital (Routledge Revivals)

International Comparisons

First published in 1990, this is the first text to offer a geographic and regional study of venture capitalism. Although the importance of this type of capitalism in creating and nurturing small firms has long been recognized, it does not have a uniform global character. Drawing on previously unused data, Green's book offers a geographic comparison which displays the diverse forms of venture capitalist markets from the well established to the newly emerging and the rapidly disappearing.
