This book is a unique collection of some of the latest research from a range of leading creativity researchers. Providing a clear understanding of the main concepts, this book: - Introduces creativity from an inter-disciplinary perspective - Discusses the environmental determinants of creativity development - Explores creativity research in the differing disciplines of business, music and education Creativity Research will be of interest and importance to researchers across a variety of subject disciplines, as well as students and practitioners of creativity, innovation and organizational behaviour, amongst others.
