Success depends on refining your intuition to a level that allows you to take the next step with unshakable confidence. But bringing yourself to this level is a daunting challenge--one that often requires you to override the logic of your acquired knowledge. With insights from industry success stories, exercises, and analysis from psychologists and psychiatrists, The Intuitive Trader shows traders and investors how to capitalize on their powerful intuitive skills so that they can take their trading to a new level. * Interviews with preeminent psychologists and psychiatrists about developing intuition * Extensive exercises that show the reader how to use intuition to enhance trading performance * Words of wisdom from successful traders and investors, including Tony Saliba, Linda Raschake, Paul Tudor Jones, Jimmy Rodgers, and George Soros ROBERT KOPPEL (Chicago, Illinois) is President of Future Skills, a Chicago-based consulting firm that works with individual traders, CTA's and brokerage firms. Some are born with it. Others acquire it. Everyone wants it. It's the ultimate market wisdom, and your key personal asset on the road to financial success--it's intuition. In The Intuitive Trader, Robert Koppel draws on his extensive knowledge of the markets--culled from decades of frontline experience, as well as insightful interviews with top traders--to lay out a fascinating, practical "blueprint" for developing and honing intuitive trading skills. Success depends on refining your intuition to a level that allows you to take the next step with unshakable confidence. But bringing yourself to this level is a daunting challenge--one that often requires you to override the logic of your acquired knowledge. It begins with self-awareness, a notion that many traders resist, looking instead to black-box trading systems and the expertise of self-proclaimed "gurus." Koppel explains why relying solely on empirical reasoning can actually inhibit your trading performance. He demonstrates why you need to combine the deductive with the inductive--integrating the intellect with the intuitive. Along with penetrating analysis by psychologists and psychiatrists, The Intuitive Trader is filled with industry success stories from the likes of: * Linda Leventhal, the independent trader and current member of the Chicago Mercantile Exchange who discusses the thrills and dangers of trading in the pit; * Howard Abell, equally at home trading on the floor or in front of a computer screen, who recalls a lifetime of lessons in the importance of understanding--and loving--the process; * Thomas Belsanti, the interest rate, stock option, foreign currency, and livestock wizard who explains how he stays motivated and confident day in, day out; * Charles Faulkner, the strategies expert whose extensive writings on the science of success explore how and why people succeed in the market. With extensive exercises that will show you how to use intuition to enhance your trading performance, The Intuitive Trader provides the insights and techniques you need to take your trading to a new level.
