

Hagen / Zuckerman

Inorganic Reactions and Methods, the Formation of Bonds to Halogens (Part 1)

For the first time the discipline of modern inorganic chemistry has been systematized according to a plan constructed by a council of editorial advisors and consultants, among them three Nobel laureates (E.O. Fischer, H. Taube and G. Wilkinson). Rather than producing a collection of unrelated review articles, the series creates a framework which reflects the creative potential of this scientific discipline. Thus, it stimulates future development by identifying areas which are fruitful for further research. The work is indexed in a unique way by a structured system which maximizes its usefulness to the reader. It augments the organization of the work by providing additional routes of access for specific compounds, reactions and other topics.

Inorganic Reactions and Methods Volume 3 Founding Editor J. J. Zuckerman Editor A. P. Hagen

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9780471186564

Medium: Buch

ISBN: 978-0-471-18656-4

Verlag: Wiley

Erscheinungstermin: 07.12.1989

Sprache(n): Englisch

Auflage: Volume 3 Auflage

Serie: Inorganic Reactions and Methods

Produktform: Gebunden

Gewicht: 1270 g

Seiten: 744

Format (B x H): 161 x 240 mm
