The Canopic Equipment Of The Kings of Egypt

First published in 1994. The term 'Canopic', as applied to the containers employed by the Egyptians to contain the embalmed internal organs of the deceased, derives from a case of mistaken identity. The aims of this monograph are primarily archaeological and historical, to document all canopic equipment attributable to the kings of Egypt, and to discuss each element in its spatial and temporal context. Translations of all available texts are provided, but no attempt is made to discuss them from a detailed religious or philological standpoint.
