## Wild Capitalism

Environmental Activists and Post-Socialist Ecology in Hungary

---

Wild Capitalism examines environmental issues in the "New Europe" of the twenty-first century. Specifically, it looks at how the meanings of "civil society" and "environment" have changed as environmentalists encounter the political and ecological realities of life after state socialism. Although environmentalism is a global social movement, environmental politics is a grassroots process in which activists creatively translate environmental issues into cultural idioms and political processes.
