

Diaspora Governance and Transnational Entrepreneurship

The Rise of an Emerging Global Social Pattern in Migration Studies

A burgeoning literature is currently exploring the rise of a new migratory profile: migrants engaged in Transnational Entrepreneurship, referring to immigrants who are engaged in cross-border business involving their country of origin and destination, both perceived as lands of opportunity. Until now, little has been done in linking business studies and migration studies in this particular field of research on diaspora politics and Transnational Entrepreneurship; besides, the focus has mostly been on identifying the key independent variables, patterns, and developing hypotheses on the favourable and non-favourable factors promoting migrant business involvement in the country of residence alone. This book collects the main findings of the European Horizon-2020-RISE Project "DiasporaLink", a multidisciplinary project that has gathered the most prominent scholars in their respective field. Grounded in a variety of empirical evidences of the impact of Transnational Entrepreneurship, the book aims to explore the new global social pattern of entrepreneurs doing business transnationally. The chapters in this book were first published as a special issue of the Journal of Ethnic and Migration Studies.
