Making with Data

Physical Design and Craft in a Data-Driven World

How can we give data physical form? And how might those creations change the ways we experience data and the stories it can tell? *Making with Data: Physical Design and Craft in a Data-Driven World* provides a snapshot of the diverse practices contemporary creators are using to produce objects, spaces, and experiences imbued with data. Across 25+ beautifully-illustrated chapters, international artists, designers, and scientists each explain the process of creating a specific data-driven piece—illustrating their practice with candid sketches, photos, and design artifacts from their own studios. The author website, featuring updates and more information about the projects behind the book, can be found here: <https://makingwithdata.org/>. Featuring influential voices in computer science, data science, graphic design, art, craft, and architecture, *Making with Data* is accessible and inspiring for enthusiasts and experts alike.
