

## Get Through Radiology for the MRCS and the FRCS

---

An essential handbook that covers the radiological findings of all the common surgical conditions. Candidates preparing for the MRCS or FRCS (in General Surgery) exams will find this indispensable guide will prepare them for a wide range of questions, including rare and obscure examples that are not found elsewhere. Radiological findings are presented according to systems such as colorectal, upper GI and HPB, urology, emergency surgery and others. Each chapter describes the use of radiological modalities in different clinical scenarios and includes figures illustrating the defining characteristics of common clinical scenarios. The clear and illustrated content provides the knowledge required to answer what would otherwise be some of the most difficult questions in postgraduate surgical examinations. It is also a practical reference book that can be kept at hand to inform ward rounds and multidisciplinary team meetings. MRCS and FRCS exam candidates are expected to have a knowledge of radiological findings for all surgical conditions, and this concise guide will ensure that candidates are well prepared to answer questions accurately and with confidence.
