Archipelago Tourism Revisited

Core-Periphery Dynamics after the Pandemic

This timely and innovative book explores the dynamics of inter-island/island-island tourism – also known as archipelago tourism – on the cusp of the post-pandemic epoch. Embellished with illustrative maps and diagrams, the volume examines what novel approaches have been developed, if at all, so as not to repeat past mistakes, and nurture a more sustainable, 'island tourism' business model. It looks at how the political-economic relationship between main and outer islands changed during the pandemic and, if so, whether this shift has had a bearing on current tourism policy. The book also explores how these and other changes are reflected in how islands are branded; island destinations are marketed; and island transport logistics play out. An array of archipelagos of varying sizes and locations is explored, assuring a global perspective. The book furthers our understanding of core-periphery dynamics in archipelago tourism. The volume will be of interest to students, researchers, policy makers and academics in the fields of tourism policy and planning, sustainability, island studies and development studies.
