Smart Farming Technologies to Attain Food and Nutrition Security

The concept of Rainbow Revolution is an integrated development of crop cultivation, horticulture, forestry, fishery, poultry, animal husbandry, and food processing industry. The concept of Smart Farming Technologies in agriculture is a step towards sustainability. India has already achieved resilience in agriculture, including the horticultural sector, through effective agricultural technology generation and is now on the threshold of a "rainbow revolution" that will ensure both household nutrition security and prosperity for its people. This book will be of immense value to the scientific community involved in teaching, research and extension activities related to strategies for achieving Rainbow Revolution for enhancing farmers' income, food, and nutrition security. The book can also serve as a very useful reference for policymakers and practicing farmers.
