## Learning, Food, and Sustainability

Sites for Resistance and Change

---

This edited volume explores the intersection of learning and food, both within and beyond the classroom, all within the context of sustainability. Taking a broad pedagogical approach to the question of food, it focuses on learning and change in a number of key sites including schools, homes, communities, and social movements, keeping in mind that we need to learn our way out of our current unsustainable food system and in to more sustainable alternatives.
