

Chinese Youth in Transition

Featuring original research findings from a key Chinese national research centre, this book provides researchers with cutting-edge, reliable and comprehensive information about children and youth in modern China. The book employs a unique methodology to analyze China's youth in terms of human capital development in a transitional economy. Coverage spans a wide range of critical issues, including: children's physical and mental development, leisure and consumption choices, youth employment, pop culture, one-child families, internet use, and juvenile delinquency. Written specifically for undergraduate and graduate courses in Economics, China studies, and Development, the book will also be of interest to those wishing to understand Chinese consumer behaviour in this diverse and dynamic region.
