ANALYSIS OF NEUROGENIC DISORDE

Analysis of Neurogenic Disordered Discourse Production provides a comprehensive review and discussion of aphasia and its related disorders, their corresponding clinical discourse symptoms that speech-language pathologists and related healthcare professionals should address, and the different methods of discourse elicitation that are research- and clinically-oriented. Contemporary issues related to disordered/clinical discourse production are covered, and discussions of various treatment options in relation to discourse symptoms are included. Finally, the manifestation of discourse symptoms as a function of speakers' bilingual/multilingual status and specific considerations related to clinical assessment and intervention are explored. Readers who want to learn the background and techniques of discourse analysis, refresh their knowledge of discourse production, update their knowledge of assessment and treatment of discourse production, and learn about contemporary issues of discourse annotation and analysis using existing computer software will find this book a valuable tool. With its comprehensive coverage, it offers a thorough understanding of the nature, assessment, and remediation of discourse deficits in aphasia and related disorders. Readers will also benefit from examples throughout the book that connect theory to real-life contexts of discourse production.
