

## Cardiovascular Risk Management

---

\* Practical ABC style \* Enables doctors to prioritise treatment using risk-scoring systems and holistic recommendations for reducing cardiovascular risk \* Includes treatment plans for individuals with diabetes, who are at high risk of developing cardiovascular disease \* How to reduce cardiovascular risk in other specific patient groups \* Developed by expert groups in different regions of the world

Cardiovascular Risk Management provides a comprehensive, practical, easy-reference guide to encourage appropriate management of cardiovascular disease and implementation of the many guidelines and risk assessment methods available for this purpose. This brand new book enables doctors to prioritise treatment using risk-scoring systems and holistic recommendations for reducing cardiovascular risk, providing an overview of why it is important to prevent and treat cardiovascular disease, how to achieve this and the key cardiovascular guidelines available. It includes core guideline recommendations and areas of discrepancy between guidelines, the different risk calculators, treatment recommendations and emerging risk factors and therapies, as well as treatment plans for individuals with diabetes who are at high risk of developing cardiovascular disease. This is an ideal text for general practitioners, junior doctors, medical students and nurses.
