## Polymers in Medicine

Biomedical and Pharmacological Applications

This book contains the collected papers presented at the International Symposium on Polymers in Medicine, Biomedical and Pharmacological Applications, which was held at Porto Cervo, Italy, May 24-28, 1982. To the best of our knowledge, this symposium was the first to be organized in Italy entirely devoted to the several aspects of the use of synthetic and semisynthetic macromolecular materials in the field of biomedical and pharmacological applications. The intention of the Organizing Committee of the symposium was the promotion of a scientific and cultural initiative to gain the attention of various experts in line research of the potential of suitably designed "man-made" polymeric materials in biomedical applications. With highly qualified and worldwide attendance, the above goal was fully satisfied. Indeed the opportunity of meeting together in a well conceived and discreet corner of the world, scientists with different cultural backgrounds and objectives helped extend the meaning of the symposium far beyond the Italian borders and the perspectives of the National Research Council of Italy (CNR), the major sponsor of the meeting.
