“The Mallicoat text provides an excellent set of contemporary readings on topics relating to Women and Crime. I highly recommend this text for Professors.” —Dr. Sandra Pavelka, Florida Gulf Coast University
Women, Gender, and Crime: A Text/Reader, Third Edition presents issues of gender, crime, and criminal justice in context through edited research articles enhanced by brief authored sections. Each article is carefully edited to demonstrate the application of the concepts presented in the text. Author Stacy Mallicoat brings all the content together by highlighting underlying themes of race and diversity, helping students gain a better understanding of women as victims, offenders, and criminal justice professionals. New to the Third Edition: - More than 50% new journal articles introduce students to important topics such as transformative feminist criminology, human trafficking, gender specific programs for juveniles, the impact of social ties on long term recidivism, social relationships and group dynamics for female inmates, and more. - Fourteen new or updated case studies present compelling examples that connect concepts to real-life occurrences by covering key issues, such as, sexual victimization at military academies, stalking on college campuses, pregnancy and policing, and self-care for victim advocates. - Expanded coverage of critical topics make students aware of important issues such as multiple marginalities and LGBT populations, cyberstalking, labor trafficking, women and pretrial release, and challenges faced by female police officers. - Updated statistics, graphs, and tables demonstrate the most recent trends in criminology.
