## Pro PerformancePoint Server 2007

Building Business Intelligence Solutions

---

Pro PerformancePoint Server 2007 is Microsoft's latest product in its line of business intelligence applications, a piece of software that gathers data from corporate databases and delivers it to an end user in a friendly, graphical fashion. PerformancePoint offers the next step in the digitization world. Businesses now have gigabytes upon terabytes of data in databases; there's a need to interpret the data and glean key business insights from it and PerformancePoint. Author Philo Janus walks you through the business process management and architecture of the PerformancePoint product before delving into developing a complete business intelligence solution, from start to finish.
