Innovations in Digital Libraries

The development and the interaction of the science and the technology have created the fast growth of the human knowledge. The knowledge and the information has becoming the key point of the social development, which makes the knowledge innovation become the hot spot of the global attention. But the library management is the important means of the knowledge dissemination and the knowledge innovation, which arouses the people's attention in the world. This book elaborates on how technological innovations have led to the improved information management and library services. This book highlights and study that the combination of these effects is likely to have a positive impact not only from an economic point of view but more broadly from a social point of view.
