## How Materials Matter

Design, Innovation and Materiality in the Pacific

---

How does design and innovation shape people's lives in the Pacific? Focusing on plant materials from the region, How Materials Matter reveals ways in which a variety of people – from craftswomen and scientists to architects and politicians – work with materials to transform worlds. Recognizing the fragile and ephemeral nature of plant fibres, this work delves into how the biophysical properties of certain leaves and their aesthetic appearance are utilized to communicate information and manage different forms of relations. It breaks new ground by situating plant materials at the centre of innovation in a region.
