Challenges and Opportunities for Transportation Services in the Post-COVID-19 Era

During the pandemic, transportation industries have heavily suffered from the overall lack of passengers. A substantial share of employees have been laid-off, and others have turned to different industries. As mass vaccinations begin worldwide, movement restrictions will continue to evolve and disappear in the months to come, and new opportunities and challenges for transportation industries must be considered in a post-pandemic world. *Challenges and Opportunities for Transportation Services in the Post-COVID-19 Era* explores the challenges and the new directions to match travelers' needs in a post-COVID-19 world and illustrates several methodological applications in transportation to inspire scholars, researchers, and developers to further their efforts in boosting the design and use of sustainable mobility. Covering a range of topics such as green resilience and sustainability, it is ideal for transportation service managers, government officials, developers, engineers, decision-makers, analysts, academicians, researchers, instructors, and students.
