

Sustainability Mindset and Transformative Leadership

A Multidisciplinary Perspective

This volume examines the importance of leadership in developing an effective sustainability strategy. It defines the sustainability mindset and surveys the primary motivations, conditions, or environment(s) that cause leaders to embrace sustainable practices. As described in the UN Sustainable Development Goal 8, embracing the sustainability mindset will lead to greater productivity and promote economic growth. Organized into themes of organizational operations, leadership competencies, and leadership practices, the chapters, written by contributors representing global perspectives, tackle topics such as strategy, culture, and leadership styles in developing a new form of mindfulness for leaders as well as organizations. Recognizing the need for accelerated change in organizations as well as society at large, this book presents scholars with a framework for establishing a mindset for sustainability to foster much-needed transformative leadership.
