## Discourse Meaning

The View from Turkish

The volume aims to bring together original, unpublished papers on discourse structure and meaning from different frameworks or theoretical perspectives to address research questions revolving around issues instigated by Turkish. Another goal is to offer methodologically different solutions for the research gaps identified in individual chapters. The contributions are based on empirical generalizations and make use of, for example, computerized corpora as the data, examples compiled from naturally occurring discourse, or data gathered in experimental conditions. Hence, the book has a firm theoretical standing and it is empirically well-grounded. The collection is expected to be of direct interest to the community of scholars and researchers in discourse structure and semantics as well as corpus linguistics. It will appeal to undergraduate and graduate students and all interested readers, offering them a fresh view on various discourse-related phenomena from the perspective of Turkish.
