

Lipmann Symposium. Energy, Regulation and Biosynthesis in Molecular Biology

Frontmatter -- Preface -- Contents -- List of Participants of the Lipmann Symposium -- List of Contributors -- Opening Remarks -- Welcome to Professor Lipmann -- Welcome to the Max-Planck-Institut -- Introduction -- Dahlem in the Late Nineteen Twenties -- Contributions -- Cascade Control of *E. coli* Glutamine Synthetase -- Structure and Biosynthesis of an Acidic Glycoprotein in a Bacterial Cell Envelope -- Degradation of Thyrotropin Releasing Hormone (TRH). Its Inhibition by Pyroglu-His-OCH₃ and the Effect of the Inhibitor in Attempts to study the Biosynthesis of TRH -- Amphibian Cells in Culture: An Approach to Metamorphosis -- The Hexokinase-Mitochondrial Binding Theory of Insulin Action -- N-Terminal Acetylation of Proteins, a Post-Initiation Event -- Why is Insect Immunity Interesting? -- Energy Transduction in Membranes of *Mycobacterium phlei* -- Control by Peptidyl-tRNA of Elongation Factor G Interaction with the Ribosome -- A Cytoplasmic Function for the Polyadenylic Sequences of Messenger RNA -- Purification and Biological Properties of a Plasminogen Activator Characteristic of Malignantly Transformed Cells -- Interactions of Troponin Subunits Underlying Regulation of Muscle Contraction by Ca Ion: A Study on Hybrid Troponins -- Studies on the Binding of Acylaminoacyl-Oligonucleotide to Rat Liver 60S Ribosomal Subunits and Its Participation in the Peptidyltransferase Reaction -- Regulatory Phosphorylation of Purified Pig Liver Pyruvate Kinase -- A Soluble Elongation Factor Required for Protein Synthesis with mRNA's other than Poly (U) -- Variations in the Lactate Dehydrogenase Isoenzyme Pattern in Arteries -- Biochemical Development of the Heart in Syrian Hamsters -- On the Mechanism of Inhibition of Globin Chain Initiation by Pactamycin -- The Ribosomal Binding Site of the Antibiotic Thiostrepton -- tRNA Structures in Viral RNA Genomes -- Remarks on the Acquisition of Active Quaternary Structure of Enzymes -- Covalent Binding of Bilirubin to Agarose and Use of the Product for Affinity Chromatography of Serum Albumin -- Transmitter Biochemistry of Single, Identified Neurons -- Regulation of Apoferritin Biosynthesis in Rat Liver -- High Lipoprotein Lipase Activity and Cardiovascular Disease -- Gramicidin S-Synthetase: Active Form of the Multienzyme Complex is Undissociable by Sodium Dodecylsulfate -- Studies on the Biosynthesis and Structure of Renal Glomerular Basement Membrane -- Ribosomes and the Target Theory -- Interrelation Between Tyrocidine Synthesis and Sporulation in *Bacillus brevis* -- Intergeneric Complementation of RNA Polymerase Subunits -- Studies on Liver Elongation Factor 1 -- Some Thoughts on the Regulation of Arginine Biosynthesis and its Relation to Biochemistry -- Mechanism of the Cell Cycle in DNA Synthesis in Sea Urchin Embryos -- Ribosome Metabolism in Starving Relaxed *E. coli* Cells -- Subcellular Localization in the Ehrlich Ascites Cell of the Enzyme which Oxidizes Dihydroorotate to Orotate -- Comparison of Polypeptide Chain Initiation Factors from *Artemia salina* and Rabbit Reticulocytes -- Thiamine-Binding Protein of *Escherichia coli* -- Photoaffinity Labelling of tRNA Binding Sites on *E. coli* Ribosomes -- Identification of Central Transmitters with Electrically Stimulated Brain Slices -- The Acetylation of Cysteine-281 in Glyceraldehyde-3- Phosphate Dehydrogenase by an S-S Transfer Reaction -- Regulation of Elongation Factor G-Ribosomal GTPase Activity -- Deoxynucleotide-Polymerizing Enzymes of Murine Myelomas -- Properties and Functions of Ethanol-Potassium Chloride Extractable Proteins from 80S Ribosomes and their Interchangeability with the Bacterial Proteins L7/L12 -- Choline Acetyltransferase: Reactions of the Active Site Sulfhydryl Group -- Control of Gene Expression by *E. coli* Virus T7 -- Covalent Enzyme-Substrate Intermediates in Carboxyl Activation -- The Role of Pantothenate in Citrate Lyase -- Cleavage of Small DNAs with Restriction Nucleases -- The Ribosomal and Nonribosomal Synthesis
