

Color Atlas of Pharmacology

The Fifth Edition of Luellmann's *Color Atlas of Pharmacology* has been extensively revised to include all recent advances and new drugs, and the illustrations have been optimized and updated. Each two-page spread presents concise text on the left complemented by detailed full-color illustrations on the right to help users quickly digest important facts and concepts.

Color-coded sections provide readers with a helpful framework with which to approach the latest developments in pharmacology.

- Part 1, General Pharmacology, explains basic aspects, such as drug absorption, distribution, and elimination, along with the molecular mechanisms of drug actions
- Part 2, Systems Pharmacology, presents the different groups of drugs, emphasizing their functional and therapeutic aspects
- Part 3, Therapy of Selected Diseases, provides all the relevant information regarding the pharmacological treatment of a large number of conditions

Key features:

- User-friendly format ideal for study and review, self-assessment, and quick reference
- Completely revised and updated, with 174 color plates
- New glossary of important and interesting pharmacological terms
- Updated detailed drug indexes containing current information on drugs listed by both generic and brand names

The Fifth Edition of *Color Atlas of Pharmacology* is an essential study guide and reference for every student, nurse, and practicing physician needing to keep up to date with recent advances in the field.
