

Challenges of Latino Aging in the Americas

This book examines one of the most important demographic changes facing the United States: an overall aging population and the increasing influence of Latinos. It also looks at the changing demographics in Mexico and its impact on the health and financial well-being of aging Mexicans and Mexican Americans. The book provides a conceptual and accessible framework that will educate and inform readers about the interconnectedness of the demographic trends facing these two countries. It also explores the ultimate personal, social, and political impact they will have on all Americans, in the U.S. as well as Mexico. Challenges of Latino Aging in the Americas features papers presented at the 2013 International Conference on Aging in the Americas, held at the University of Texas at Austin, September 2013. It brings together the work of many leading scholars from the fields of sociology, demography, psychology, anthropology, geography, social work, geriatric medicine, epidemiology, and public affairs. Coverage in this edited collection includes working with diverse populations; culturally compatible interventions for diverse elderly; the health, mental health, and social needs and concerns of aging Latinos; and the policy, political, and bi-lateral implications of aging and diversity in the U.S. and Mexico. The book provides a rich blend of empirical evidence with insightful, cutting-edge analysis that will serve as an insightful resource for researchers and policy makers, professors and graduate students in a wide range of fields, from sociology and demography to economics and political science.
