

Thermal Physics and Thermal Analysis

From Macro to Micro, Highlighting Thermodynamics, Kinetics and Nanomaterials

Features twenty-five chapter contributions from an international array of distinguished academics based in Asia, Eastern and Western Europe, Russia, and the USA. This multi-author contributed volume provides an up-to-date and authoritative overview of cutting-edge themes involving the thermal analysis, applied solid-state physics, micro- and nanocrystallinity of selected solids and their macro- and microscopic thermal properties. Distinctive chapters featured in the book include, among others, calorimetry time scales from days to microseconds, glass transition phenomena, kinetics of non-isothermal processes, thermal inertia and temperature gradients, thermodynamics of nanomaterials, self-organization, significance of temperature and entropy. Advanced undergraduates, postgraduates and researchers working in the field of thermal analysis, thermophysical measurements and calorimetry will find this contributed volume invaluable. This is the third volume of the triptych volumes on thermal behaviour of materials; the previous two receiving thousand of downloads guaranteeing their worldwide impact.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783319458977

Medium: Buch

ISBN: 978-3-319-45897-7

Verlag: Springer International Publishing

Erscheinungstermin: 01.04.2017

Sprache(n): Englisch

Auflage: 1. Auflage 2017

Serie: Hot Topics in Thermal Analysis and Calorimetry

Produktform: Gebunden

Gewicht: 10107 g

Seiten: 567

Format (B x H): 160 x 241 mm
