

## The External Sector of Africa's Economy

The book examines various aspects of Africa's external economy by focusing on regional monetary arrangements and how they are affected by devaluation episodes. It investigates the relationship between current account balances, trade balances and trade openness with respect to regional integration and regional growth patterns, discusses obstacles to a successful regional integration and paths to structural transformation, and studies the impact of economic partnership on inclusive development. The book addresses researchers and policymakers interested in development economies and African economic development.
