Systemic Interventions (AT)

Systemic thinking has opened up further areas of specialization from one-on-one and couples therapy to clinical supervision and organizational development. Systemic intervention sees a problem as an incident involving a number of different, interacting individuals. In this sense, conflict, problems and occurrences are viewed and treated within the social context. This comprehensive introduction contains many examples and detailed suggestions for a practical approach to directed conversation.

Systemic interventions in theory and practice – represented by two outstanding experts in this field and directly implementable.
