

Sterbenz / Plattner / Takada

Active Networks

IFIP-TC6 4th International Working Conference, IWAN 2002, Zurich, Switzerland, December 4-6, 2002, Proceedings

and panel on active mobile networking, peer-to-peer, and the future prospects for active network research and deployment. We would like to thank the technical program committee members for their hard work in reviewing and shepherding papers. We would like to thank Bernhard Plattner, Placi Flury, and Lukas Ruff for their considerable time and support in conference organization, and for providing the infrastructure at the Swiss Federal Institute of Technology (ETH), Zurich that made the work of the program committee considerably easier. And of course it is the work of the authors that is the core of these proceedings, and the attendees' participation that makes for an outstanding working conference. We hope you enjoy the fruits of their labor.
