

Laparoscopic Hysterectomy

The Operation Primer provides excellent photographic step-by-step guidance to the surgical procedure. It has been produced to describe the operation in the simplest manner possible without over-simplifying. At the core of the Operation Primer is the section on Nodal Points, where the key surgical steps are described in detail. This surgical guide book provides essential reference material for surgeons wishing to update their knowledge in this specific area. The Operation Primer Laparoscopic Hysterectomy is specially intended for those gynecologists who wish to familiarize themselves with minimally invasive hysterectomy techniques. This Operation Primer is an excellent teaching tool, accurately describing a standardized technique not only for novices but also for experienced laparoscopic surgeons. It provides a detailed overview of presurgical considerations and preparation, key surgical steps and highlights possible pitfalls of laparoscopic hysterectomy. This Operation Primer on total laparoscopic hysterectomy (TLH) and laparoscopic supracervical hysterectomy (LASH or LSH) follows the step-by-step concept and provides a detailed manual for gynecologists who want to apply laparoscopic techniques for hysterectomy.
