Commander-in-Tweet

Donald Trump and the Deformed Presidency

Donald Trump is one of the most controversial politicians of our time. On the one hand, this refers to his policies, but on the other hand, it also refers to his political style: Trump himself explicitly sees himself as a Twitter president. But what exactly is that supposed to be? What role does Twitter play in "official" communication, for example, in relation to classic media? Communications expert Klaus Kamps addresses these questions in this popular science essay.

This book is a translation of the original German 1st edition Commander-in-Tweet by Klaus Kamps, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors. The AuthorKlaus Kamps is one of the best-known experts on U.S. politics and political communication in Germany. He is currently a professor of communication studies at Stuttgart Media University.
