Sexual and Reproductive Health in China

Reorienting Concepts and Methodology

Sexual and Reproductive Health in China: Reorienting Concepts and Methodology is translated from the original Chinese version and presents a multi-disciplinary approach to the current assessment of the changes in sexual and reproductive health during the past thirty years. This volume and the others in the SSRC series, provide western scholars with an accessible English language look at the state of current scholarship in China, and as such, does not simply provide information for the direct study of socio-political issues, but also for meta-level analysis of how the domestic scholarship in China is developing and assessing the interplay of the country's political and economic reforms with the society and daily life of its people
