

## Clause Linking and Clause Hierarchy

Syntax and pragmatics

This collective volume explores clause-linkage strategies in a cross-linguistic perspective with greater emphasis on subordination. Part I presents some theoretical reassessment of syntactic terminologies and distinctive criteria for subordination, as well as typological methods based on sets of variables and statistics allowing cross-linguistic comparability. Part II deals with strategies relating to clause-chaining, conjunctive conjugations, converbial constructions, masdars. Part III centers on the interaction between the syntax, pragmatics, and semantics of clause-linking and subordination, in relation to informational structure, to referential hierarchy, and correlative constructions. Part IV presents insights in the clause-linking and subordinating functions of some T.A.M. markers, verbal inflectional morphology and conjugation systems, which may also interact with informational hierarchy, via the backgrounding effects and lack of illocutionary force of some aspect and mood forms. The volume is of particular interest to linguists and typologists working on clause-linkage systems and on the interface between syntax, pragmatics, and semantics.
