

Approaches to Slavic Interaction

This volume provides an overview of current research priorities in the analysis of face-to-face-interaction in Slavic speaking language communities. The core of this volume ranges from discourse analysis in the tradition of interactional linguistics and conversation analysis to newer methods of politeness research. A further field includes empirical and interpretive methods of modern sociolinguistics and statistical analysis of spoken language in casual and institutional talks. Several papers focus on a semantic or syntactic analysis of talk-in-interaction by trying to show how interlocutors use certain lexical, grammatical, syntactic and multimodal or prosodic means for the management of interaction in performing specific actions, genres and displaying negotiations of epistemic, evidential or evaluative stances. The volume is rounded out by contributions to the theory of politeness where strategies of face-work in casual as well as institutional discourse are analyzed, or in which social tasks entertained by code-switching and language alternation within the interaction of bilinguals are discussed.
