## T.D. Lee

Selected Papers 1985-1996

---

This collection of papers by the renowned physicist, T.D. Lee, covers the four main areas of his work since 1985: soliton stars and black holes; discrete physics; condensed matter and many-body systems; and relativistic heavy ion collisions, particle physics and field theory. In addition, the book contains several of Professor Lee's lectures on such topics as the evolution of physics in this century and the strong link between the sciences and the arts.
