Environment Management Technology: a Glossary of Modern Terminology English-Chinese/Chinese-English

This book is written by practitioners and experts with day to day experience to support the work of managers, engineers and administrators in the protection of the environment. The current terminology in environmental management and technology has been compiled both in English and in Chinese. Both specialists and laymen will profit from this glossary that reflects the modern state-of-the-art. It will also help to promote better communication and understanding in technology transfer to Chinese speaking countries. The glossary includes over one thousand terms on various aspects of environmental management: analysis, biology, ecology, management, legislation, and pollution control technology for air, water and wastes. The focus of the glossary is on environmental protection as part of sustainable development. To make the glossary complete, terms on noise protection and safety management are also included. Background information are also provided wherever needed.
