# The Economics of Agriculture and Natural Resources

The Case of Iran

This volume is a collection of twelve selected empirical studies on the economics of agriculture and natural resources. Twenty-two authors have contributed their research to this volume. Papers of this volume are grouped into three main domains covering: Agricultural Resilience and Sustainability; Agricultural Producers and Consumers; and Energy Use in Agriculture. Organized in an analytical framework and offering comprehensive empirical data, this book focuses on agricultural sustainability and resilience, environmental efficiency, agricultural extension, foreign trade, energy use, and agricultural growth aspects of the Iranian agriculture sector. They demonstrate technical and methodological tools used for the analysis and explain their application in the agricultural sector of Iran. This book will be a valuable read for those managing agricultural enterprises, policy makers, and researchers of agricultural producers and consumers.
