## Power Struggles

Energy Security and Energy Diplomacy in the Asia Pacific

This book explores East Asia's and the Asia Pacific's energy security exploring key issues including major trans-border energy projects, major country's energy mix policy, trans-border pipelines, LNG transfer between nations, balance of power relations between major powers, the North Korean energy situation, energy alliances, Belt and Road Initiative, Indo-Pacific Strategy, World Choke point and more. In particular, this book provides the detailed analysis of the current problems of energy security and diplomacy among various countries as well as policy implications. It will clearly serve as a manual to enhance energy security in the region and boost energy transaction as well as the pioneering step to conceptualize the notion of energy security among political circles, in the diplomatic community and energy industry as well as international relations academics.

"Professor Ahn's most recent volume, Power Struggles: Energy security and energy diplomacy in the Asia Pacific, a deeply researched and timely consideration of the full range of energy security topics in Asia, serves the critical purposes of providing in-depth detail about the energy needs of Asia while also providing incisive analysis about what the international energy security environment will bear. Professor Ahn judges that a US-ROK Alliance committed to effective energy security will make a huge difference. A must-read for specialists but accessible for generalists, Power Struggles is the right book for these confounding times." —Roy D. Kamphausen, President, The National Bureau of Asian Research (USA) "This wide-ranging book is a must-read for any student of energy security in Northeast Asia. Ahn provides a wealth of information that maps existing and potential energy networks from Russia through the Korean peninsula. The chapter on energy security and the US-ROK alliance speaks to how much supply chain resilience has become a critical mission of the alliance. An excellent read for scholars and policymakers." —Victor Cha, Vice Dean and D.S. Song-KF Professor of Government, Georgetown University "Professor Se Hyun Ahn has provided timely, thoughtful, and comprehensive analysis of complex energy security challenges in the Asia-Pacific region. I highly recommend his book to those seeking to understand the interaction of energy policy, and diplomacy for energy security in a dynamic region where the growing demand for energy has profound implications for the international political economy and security." —Charles W. Boustany, Jr., Member of U.S. Congress, 2005-2017 (USA) This book explores the Asia Pacific's energy security exploring key issues including major trans-border energy projects, energy mix policy, trans-border pipelines, LNG transfer between nations, balance of power relations between major powers, the North Korean energy situation, energy alliances, World Choke point and more. Se Hyun Ahn is Professor of the Department of International Relations and the Director of the Center for Energy Security Strategic Studies in the University of Seoul.
