

Accelerators of India's Growth Industry, Trade and Employment

Festschrift in Honor of Bishwanath Goldar

This book offers a collection of distinguished contributions that identify current growth accelerators in India, and suggest policies and strategies to make India's growth more sustainable and inclusive. The papers are divided into three sections, the first of which focuses on issues related to industrial growth in India. The discussions include India's industrial development (manufacturing, construction and mining); role of manufacturing; global value chains; and of environment in industrial development. In turn, section II deals with issues related to trade and FDI as accelerators of India's growth. The respective chapters explore the changing patterns of trade, impacts of technology, and spill-over effects of FDI, to name but a few. Lastly, the third section discusses employment-related issues like measurement of labour input, the dichotomy of the Indian labour market, the nature of firms and employment generation, and impacts of technology on employment. Given its scope and focus, the book offers an invaluable resource for researchers and policymakers alike.
