

Haynes

Pollution and Its Minimization

Proceedings of the 2022 10th International Conference on Environment Pollution and Prevention

This book presents peer-reviewed papers of the 2022 10th International Conference on Environment Pollution and Prevention (ICEPP 2022), which was held in Sydney, Australia, during December 16–18, 2022. With the worldwide increase in industrialization and movement of people toward larger cities, there has been a progressive increase in environmental pollution. The issues surrounding air, water, soil, and land pollution are now considered of global concern. Minimization of pollution involves the repeated reuse of products, reduction in waste generation, and processing and recycling of resources into new products. Pollution prevention practices not only reduce waste, but also improve safety and decrease disposal costs. The book is useful for students, academics, entrepreneurs, and professionals who are working in the important field of environmental pollution and its prevention.
