Dental Abstracts

Information from around the globe is presented in this bimonthly publication featuring approximately 50 abstracts from key articles in dentistry. Dental Abstracts keeps dentists informed of developments and advances in general dentistry and its specialties in an easy-to-read, abstract format. Graphs, tables, and figures that have appeared in original articles are also included. This time-saving publication covers topics such as guided tissue regeneration, treatments for anterior single tooth implants, clinical evaluation of dentin bonding agents, and more.
